Deagglomerated Alumina Polishing Powder

Product Description:	0.05 and 0.3 micron deagglomerated alumina powder		
Ingredients:	Alpha alumina		
Applications:	Metallographic specimen final polishing		
Features:	-High surface area -Low cost -Easy to mix into polishing slurry		
DOT Shipping:	Powder – non-hazardous, non-regulated		
Properties:	Crystal size	0.05 micron	0.3 micron
	Crystal structure	Alpha	Alpha
	Processed form	Deagglomerated powder	Deagglomerated powder
	Surface area	90 m ² /gram	13.7 m ² /gram
	Purity	>98%	>98%
	Color	White powder	White powder
	Form	Fluffy powder	Fluffy powder
